-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

The undersigned Examiner supports the goal of the Office to advance prosecution as expediently as is reasonably possible. Cooperation is requested with respect to the timely submission of any references deemed pertinent to the present application along with Form PTO-1449.

Claims 1-20 are presented and represent all of the claims under consideration.

It is noted Applicant refers to the withdrawal of "phenylopropolyene" on page 6, line 21 of the specification. Is phenylpropanolamine intended?

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over both Jones et al., American Journal of Emergency Medicine, and Singletary et al., American Journal of Emergency Medicine.

Jones teaches the administration of two decongestants, oral psuedoephedrine and topical oxymetazoline, in the **prevention** of middle ear barotrauma **during** air travel. See the Abstract. The present specification teaches equivalence among the recited decongestants in alleviating the symptoms of ear and sinus cavity blockage in a descending aircraft. Jones fails to discuss sinus cavity blockage. However, Singletary teaches the administration of both systemic and topical decongestants to treat a patient suffering from symptoms of sinus cavity blockage. Therefore, in view of the combined teachings of Jones and Singletary, one skilled in the otolaryngology art would have

been motivated to prepare a kit comprising, and to administer, both oral and aerosol decongestant products from among those very well established commercial products, phenylephrine, oxymetazoline and pseudoephedrine, that are known in the prior art for alleviating the symptoms of ear and sinus blockage. Such would have been obvious in the absence of evidence to the contrary because Jones suggests such administration during a flight to prevent blockage. The determination of optimal dosages and dosing regimens are within the purview of those skilled in the art, with particular regard to the condition and medical status of the patient, through no more than routine experimentation.

No claim is allowed.
